

SIGNAL DROP 22

The six-week decay

How automation quietly de-skills your best team

SWIPE

METRICS & MAYHEM
MASTERINGOBSERVABILITY.COM

01

THE SLOW SLIDE

The team got quietly worse

We automated triage. Fewer people woken, the numbers looked great. Then a novel fault arrived and they stalled.

02

THE REAL CAUSE

You took away their reps

Every routine incident was a small rep. Automate the boring reps away and the edge goes with them.

03

THE WRONG NUMBER

Watch what you could not automate

Not how well you handle the incidents you automated. How well you handle the ones you could not.

04

THE FIX

Put the reps back on purpose

Run one live incident drill the automation cannot help with.
A novel fault, no runbook, your best people, cold.

THE FULL SIGNAL DROP

Keep your team's edge on purpose.
